FINAL NOTICE- JANUARY 4, 2017
WATER METER REPLACEMENT PROJECT

Dear SCMA Water Customer:

The Schuylkill County Municipal Authority (SCMA) – Water Department has begun a project to replace all residential and small business water meters in our service area.

Several weeks ago, SCMA sent you a notice that the Water Meter Replacement Project was currently underway. The water meter at your home or business **must** be changed in order to be compatible with the drive-by reading system currently in use. There is no cost to you for this work.

As of the date this notice was sent, we have not heard back from you. It is very important that you contact the SCMA Water Meter Replacement Project Installer, LENEGAN Plumbing & Heating, at the telephone number or web address listed below to set up an appointment for the meter replacement work as soon as possible. Access to the water meter in your residence or business is **required**. Appointments are available Monday through Friday 9 AM to 6 PM and Saturday 8 AM to 4 PM. The meter installer will have an identification badge that is approved by the SCMA. It takes approximately 15-20 minutes to change the meter. Please be sure that your water meter is accessible prior to the scheduled installation date and time. If you are a building owner, please notify your occupants of this meter replacement and water service interruption. This is a **mandatory system wide meter replacement project** and every residential and small business SCMA customer will be required to have their water meter replaced. We thank you in advance for your cooperation with the implementation of this program.
