## Clues

- 1. Our local water utility maintains fire hydrants.
- 2. A period of time with little or no rainfall is called a drought.
- 3. Pipes run underground and make up the infrastructure of the water system.
- 4. Tap water protects us against the threat of fire.
- 5. Safe tap water contributes to quality of life by increasing productivity and safety.
- 6. Water utilities provide their customers with a report on the quality of their drinking water each year.
- 7. Did you know that the first water systems in North America were built to provide fire protection?
- 8. Only tap water delivers public health protection, fire protection, support for the *economy*, and the quality of life we enjoy.
- 9. Replacing old pipes in the United States is expected to cost more than 250 billion dollars over the next 20 years.
- 10. In 2004, U.S. fire departments responded to over one million fires across the United States.
