

## NOTIFICATION OF SEWER INVESTIGATION WORK

Beginning the week of April 7, 2025, representatives from Duke's Root Control, Inc. ("Duke's") will be in the Pinebrook area and the area around Geisinger St. Lukes Hospital for the purpose of evaluating the condition of the sanitary sewer system and private sewer service laterals. Crews will be evaluating the sewer mains and laterals through smoke testing, which is a process in which non-toxic, non-flammable liquid smoke is pressurized through the sewer mains. Defects within the system are noted for repair by the crews. The pink door tags that Duke's will be placing on your door two to three days prior to the test, gives more insight on the process and what you can do to prepare. You do not need to be present for the test.

This method of testing may require representatives from Duke's to access manholes located within the Right-of-Way and/or utility easements, including those on private property but within the utility easement as well as crews may be noting defects around your property. Smoke Testing does not impact any operation of the sewer and there will be no disruption of service at any point. Your cooperation is greatly appreciated. All Duke's representatives will have identification badges and will be wearing company uniforms at all times.

Please feel free to contact Duke's at (888) 620-0010 or Schuylkill County Municipal Authority at 570-622-8240 at any time.
